Brand Guidelines

Design.
Create.
Capture.
Tell Stories.

VISUAL DESIGNER & FILMMAKER

One vision. Many ways to tell it.

Welcome to the Ali Rezaie identity.

A personal brand connecting graphic design and video production through purposeful storytelling. Each touchpoint should feel considered, cinematic and recognizably human.

Use this guide as a working system.

Start with the final logo. Choose a clear hierarchy. Give the story room. Keep every detail consistent.

Edition 01 · October 2026 · Identity rules and editable application templates

Contents & how to use this guide

01 / Logo system 04–10

02 / Color 11–15

03 / Typography & voice 16–20

04 / Visual language 21–25

05 / Stationery 26–30

06 / Digital & motion 31–38

07 / Brand strategy 39–48

Logo system

01

LOGO SYSTEM

One authoritative mark. A consistent signature across every medium.

The final AR mark

Creative form. Cinematic focus.

The final AR geometry establishes a bold visual signature. The red lens circle adds a focused cinematic cue, linking design and filmmaking.

Import. Never redraw.

Use AR_Final_Logo.svg as the master. Preserve its exact vector paths, overlapping geometry, aspect ratio, white fill and red circle.

Source viewBox: 227.59 × 188.20 · Aspect ratio: 1.20925:1 · The paths remain editable vectors.

Logo signatures & hierarchy

Ali Rezaie

Visual Designer & Filmmaker

Primary signature

Logo + name + descriptor for first introductions. Keep the mark at least 1× its own width away from unrelated content.

AR mark

Compact applications, avatars and watermarking.

Supporting wordmark

Inter Bold, title case. This is supporting editable typography, never a replacement for the approved AR geometry.

Clear space & proportions

A measured breathing space

Define x as the lens diameter: 33.78 source units, or 14.84% of total logo width. Keep at least x clear on all four sides.

Preserve the original geometry

Scale uniformly. Never alter the AR shape, circle, overlaps or letter relationship. The source bounding box is the scaling reference.

x = lens diameter

Guideline overlay is separate from the logo. Clear-space boxes are never part of exported artwork.

Minimum size & legibility

Digital minimum: 32 px wide

At 32 px, the lens diameter is approximately 4.75 px. Use 48 px or larger for routine interfaces; 64 px or larger for profile assets.

32 px 48 px 64 px 96 px

Print minimum: 12 mm wide

At 12 mm, the lens diameter is approximately 1.78 mm. Always proof at final size. Increase for absorbent stock, embroidery or low-resolution production.

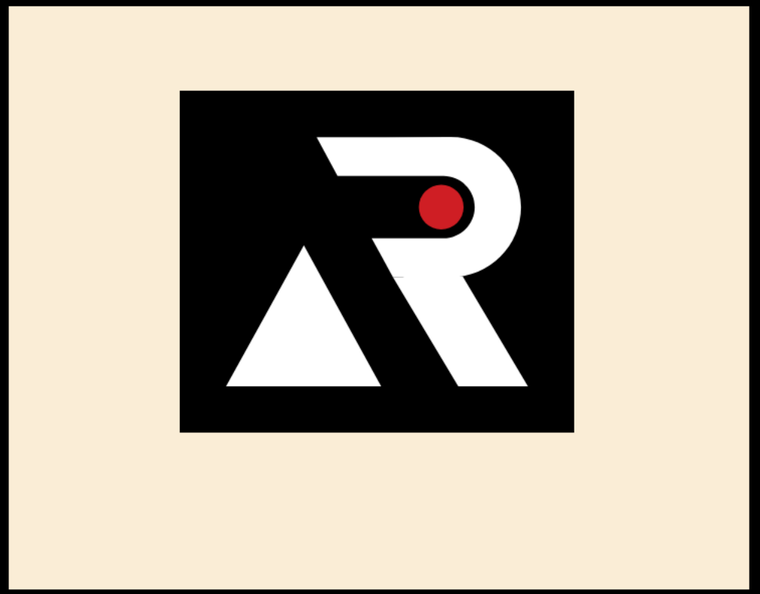

Recommended starting standards; confirm legibility on the actual material and at normal viewing distance.

Background control

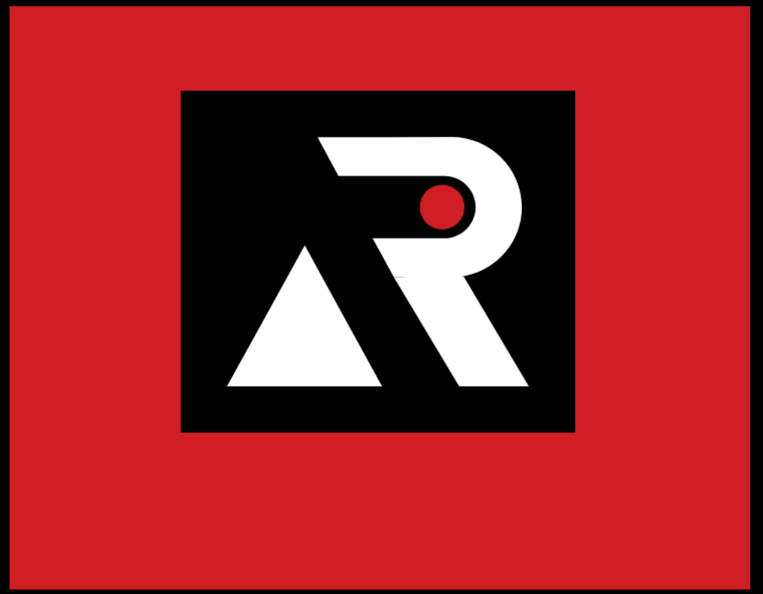

Direct on Black

Preferred master presentation.

Black carrier on Cream

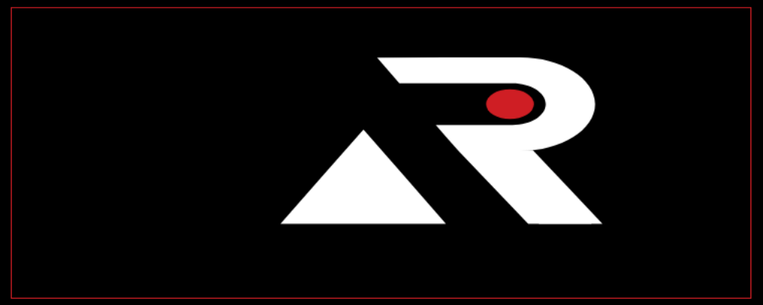

Retain the exact white + red logo using a black carrier.

Black carrier on Red

Retain the exact white + red logo using a black carrier.

Logo misuse: protect the signature

× Do not stretch

× Do not rotate

× Do not recolor

× Do not add effects

× Do not crop

× Do not place on busy imagery

No flames, extra symbols, replacement lettering, decorative outlines or new lens geometry.

Color

02

COLOR

Cardinal Red. Absolute Black. Warm Cream.

The core palette

Cardinal Red

#CF1E24
RGB 207 / 30 / 36
CMYK 0 / 86 / 83 / 19

Black

#000000
RGB 0 / 0 / 0
CMYK 0 / 0 / 0 / 100

Cream

#FAEDD6
RGB 250 / 237 / 214
CMYK 0 / 5 / 14 / 2

CMYK values are mathematical starting points, not press matches. White #FFFFFF is retained only in the source logo.

Color roles & balance

Black / cinematic base

Use as a primary field, logo carrier and focused presentation surface.

Cream / breathing room

Use for editorial sections, stationery and readable text on dark backgrounds.

Red / intentional energy

Use for dividers, focal points and key actions. Avoid filling every surface with red.

Readable color combinations

Aa

Cream on Black

≈ 18.1:1
Body + headings

Aa

Cream on Red

≈ 4.7:1
Body + headings

Aa

Red on Black

≈ 3.9:1
Large type / accents

Calculated sRGB contrast. Target 4.5:1 for normal text, 3:1 for large text. Red on Black fails normal-text AA.

Digital & print color workflow

01

Digital

Use the exact hexadecimal values in sRGB. Export SVG for logos; PNG at 2× for raster interfaces.

02

Print

Convert using the printer’s ICC profile. Request a proof for Cardinal Red and Cream before production.

03

Black ink

Use 100K for small text. Ask the printer for their preferred rich-black recipe for large fields.

Cream is a color, not a stock guarantee.

Choose paper deliberately. Cream stock changes perceived color; white stock requires a printed Cream field. Approve a physical sample.

Do not invent a spot-color match.

No Pantone reference is assigned. Select and approve a physical swatch with the print vendor if a spot ink is required.

Typography

03

TYPOGRAPHY

Inter only. Clear hierarchy. Strong rhythm.

Inter: one family, many voices

Aa Bb Cc

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789 !?&@#% / —

Bold / 700

Headlines, names and key statements.

Medium / 500

Navigation, labels and subheads.

Regular / 400

Body copy, captions and longer reading.

A scale that holds together

Display	72 / 80 px · Bold
Heading	40 / 48 px · Bold
Subheading	24 / 32 px · Medium
Body	18 / 28 px · Regular
Caption	14 / 20 px · Medium
Micro	12 / 18 px · Regular

Typesetting & editorial rhythm

01

Keep it left aligned

Use ragged-right paragraphs. Aim for 45–75 characters per line. Avoid full justification.

02

Use sentence case

Reserve capitals for compact labels. Keep brand headlines direct and readable.

03

Build with space

Use a 28 px line height for 18 px body copy. Separate paragraphs by 16–24 px.

Ideas with purpose. Stories with impact.

I help brands turn ideas into visual systems and films that connect. Every detail has a job. Every frame carries a story.

ALI REZAIE / SELECTED WORK

Voice, message & tagline

Design. Create. Capture. Tell Stories.

Clear

Use concrete language. Explain the outcome before the technique.

Confident

Show judgment through specifics. Avoid exaggerated claims and jargon.

Human

Speak directly. Be collaborative, thoughtful and concise.

Approved tagline: “Design. Create. Capture. Tell Stories.” Preserve the words, sequence and punctuation.

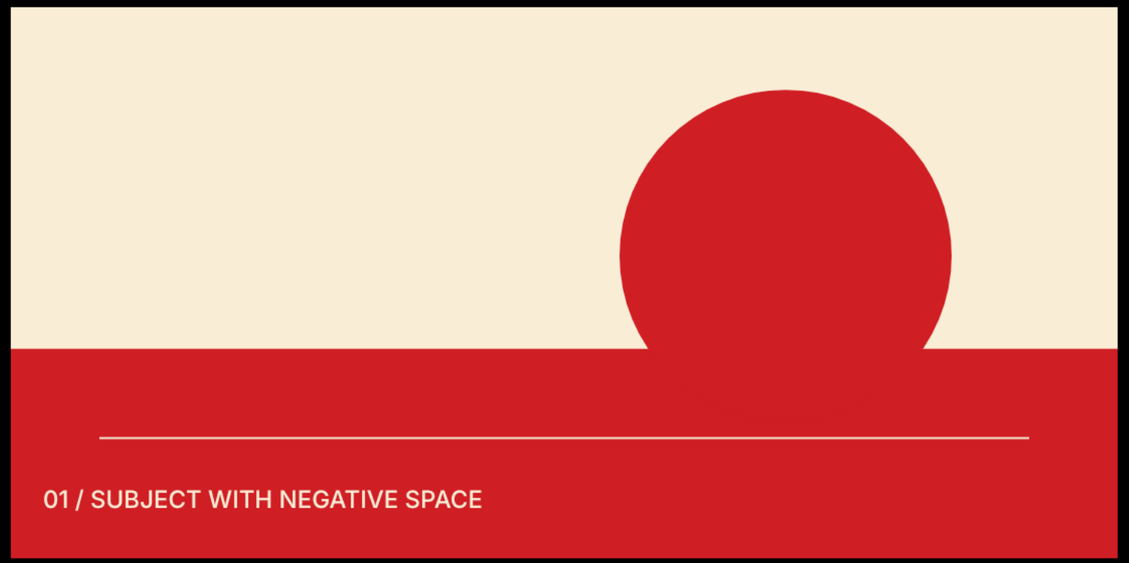

Visual language

04

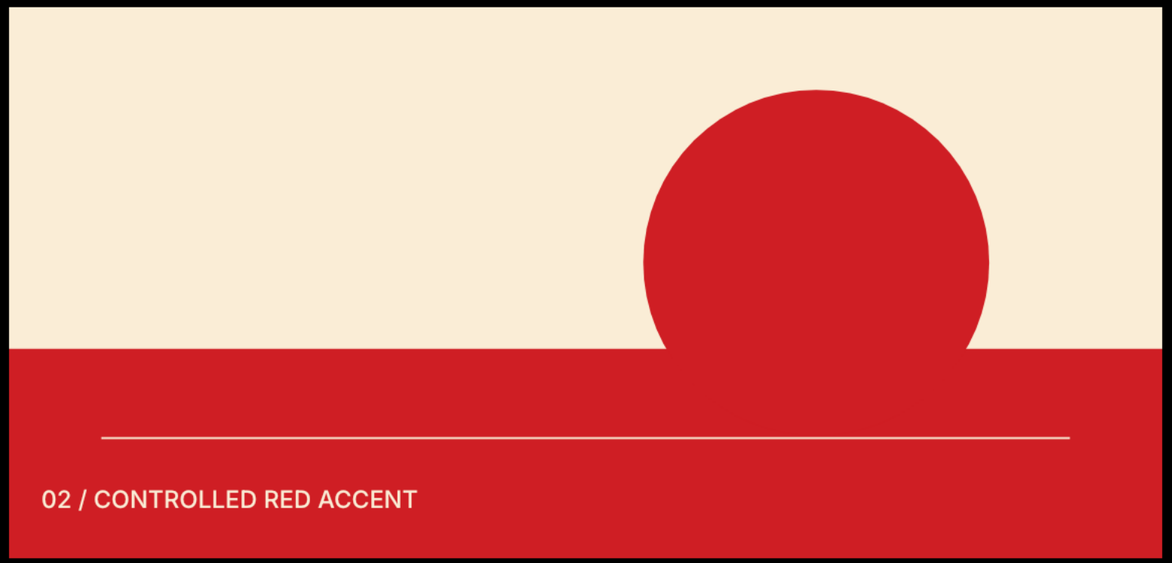

VISUAL LANGUAGE

Cinematic framing, deliberate space and restrained graphic detail.

Photography & image direction

01 / SUBJECT WITH NEGATIVE SPACE

02 / CONTROLLED RED ACCENT

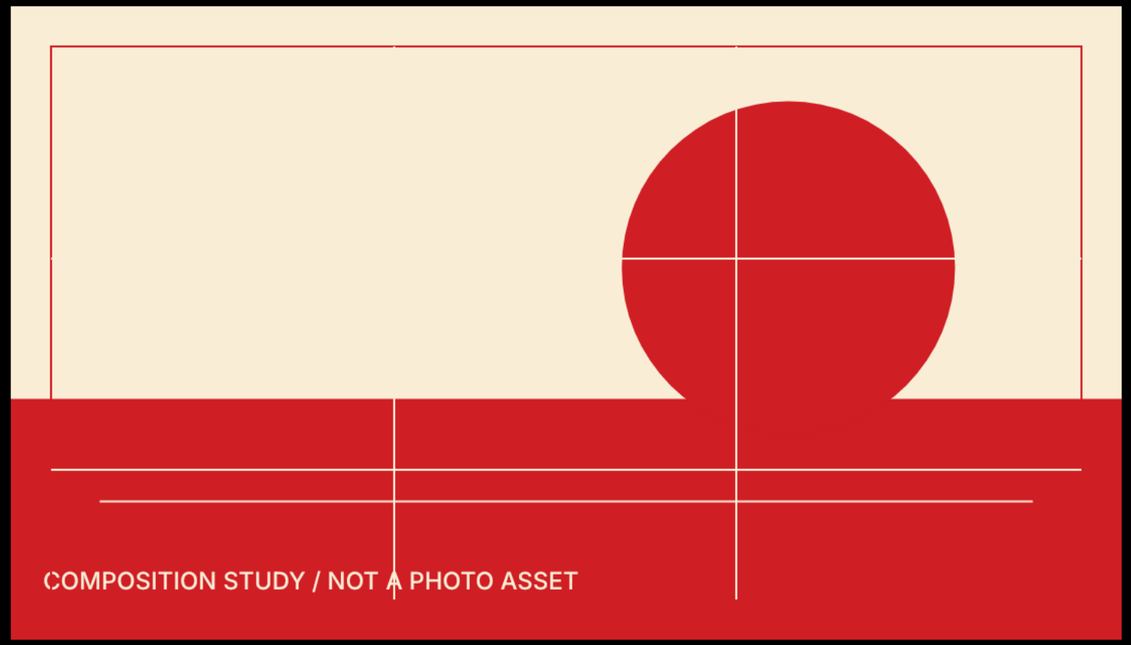

Light with intention

Use directional light, rich shadows and natural skin tones. Favor authentic people, creative process and tactile details.

Edit with restraint

Keep color natural, blacks controlled and contrast consistent. Avoid heavy filters, cluttered crops and generic stock clichés.

Image framing & treatments

Shoot for the crop

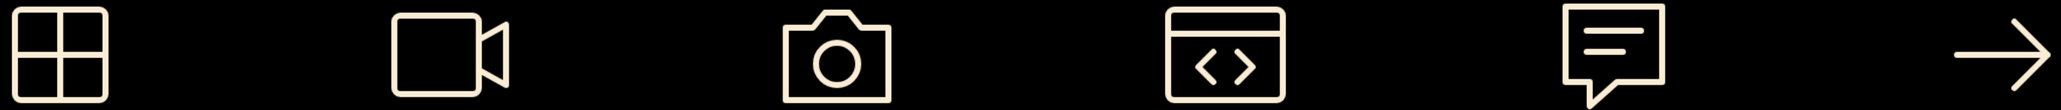

Compose for 16:9 films, 4:5 feed images and 9:16 vertical video. Keep subjects and titles inside platform-safe areas.

Keep the logo legible

Place the unchanged logo on a quiet black field. Use a black backing when imagery competes; never rely on a drop shadow.

Shown: editable composition studies. Replace with rights-cleared project photography before publishing applications.

Iconography: a coherent supporting set

DESIGN FILM PHOTO WEB STORY ARROW

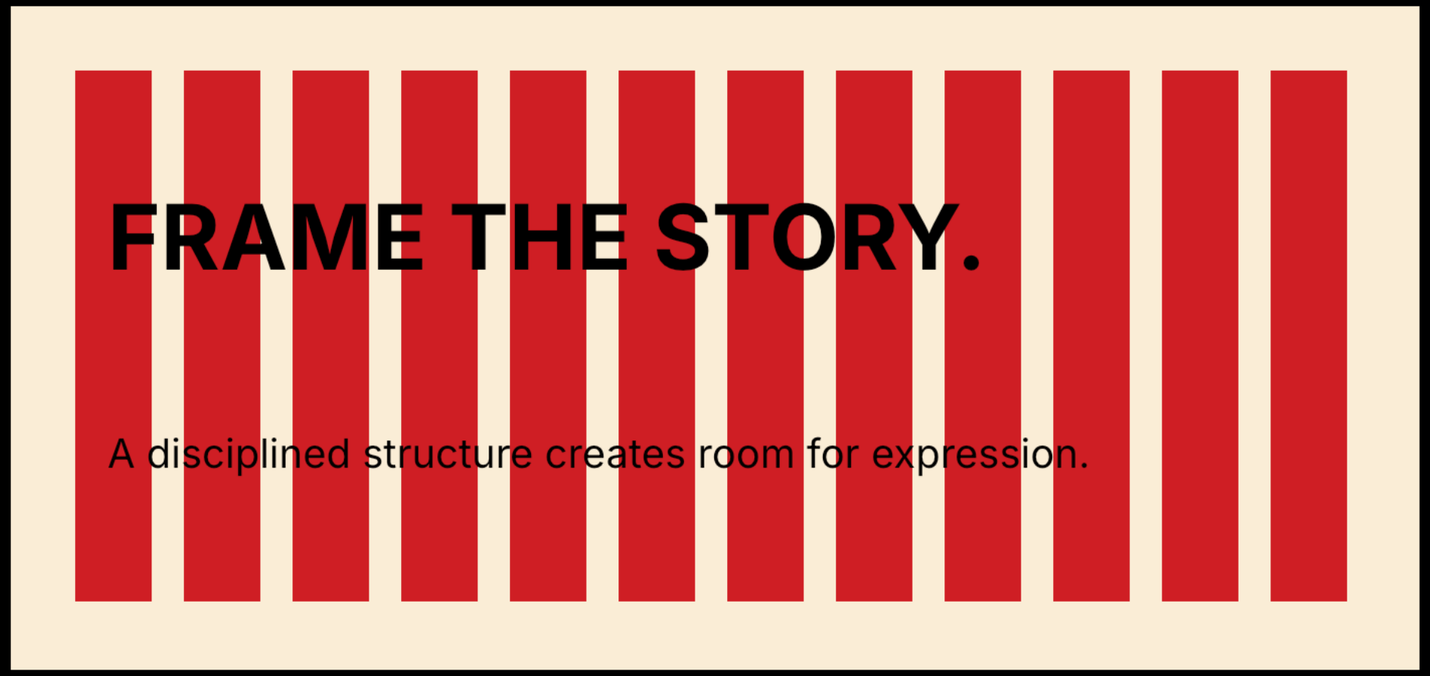

One drawing language

Use a 48-unit source grid with 2-unit strokes. Round joins and caps. Keep optical weight consistent and leave room at small sizes.

Use with purpose

Icons support service labels and navigation. Choose Cream on Black or Black on Cream; use Red as an intentional emphasis.

Grid, spacing & graphic accents

Desktop / 12 columns

64 px outer margins. 24 px gutters. For these 1280 px slides: 74 px columns.

Mobile / 4 columns

24 px margins, 16 px gutters. Use spacing steps 8 / 16 / 24 / 32 / 48 / 64.

Use thin 1 px accent rules, modest red fields and lens circles as separate graphics. Never distort the logo into a pattern.

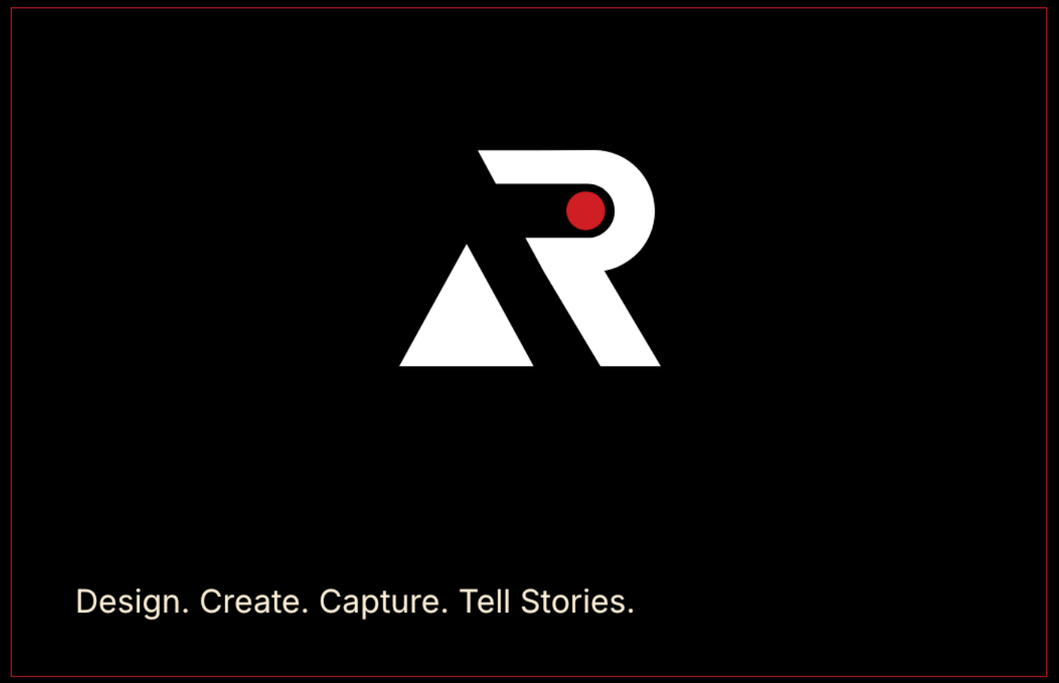

Stationery

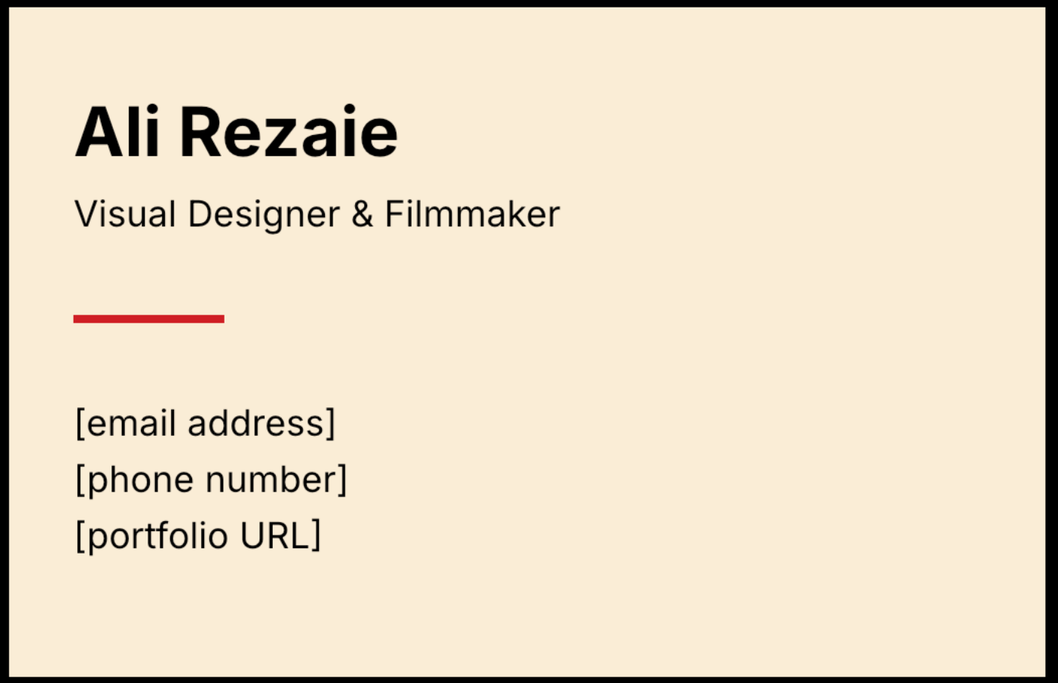

05

STATIONERY

Tactile, quiet and unmistakably considered.

Business cards: front & reverse

85 × 55 mm trim · 3 mm bleed · 4 mm safety · Recommend 350 gsm uncoated stock; proof both sides.

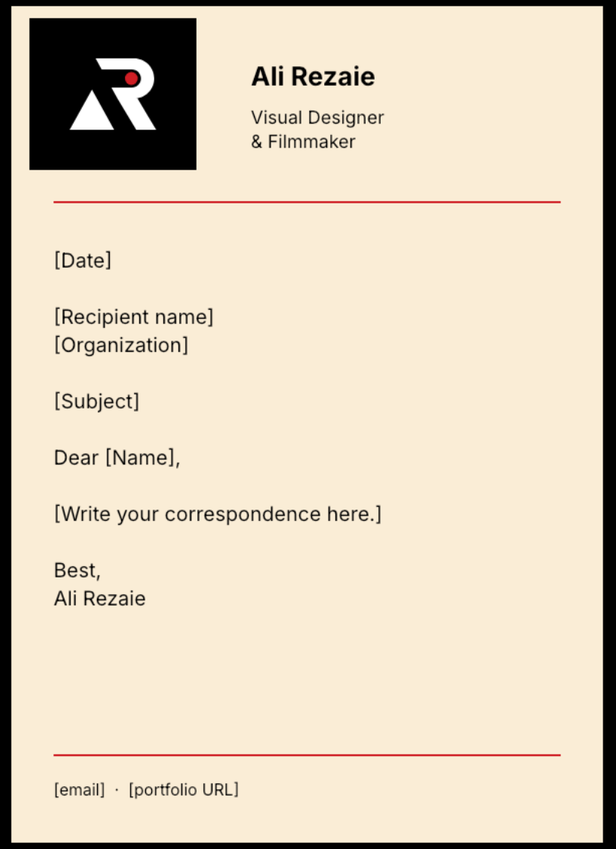

Letterhead & correspondence

A clean editorial foundation

A4 portrait: 210 × 297 mm. Use a 15 mm content margin; keep the logo modest and the message dominant.

Correspondence hierarchy

Inter 10–11 pt body with 14–16 pt leading. Black text on Cream. Red rules organize the page without competing with the content.

Envelope & folder

[Country]

DL envelope · generous address space

SELECTED WORK

Folder · black stock / white + red print

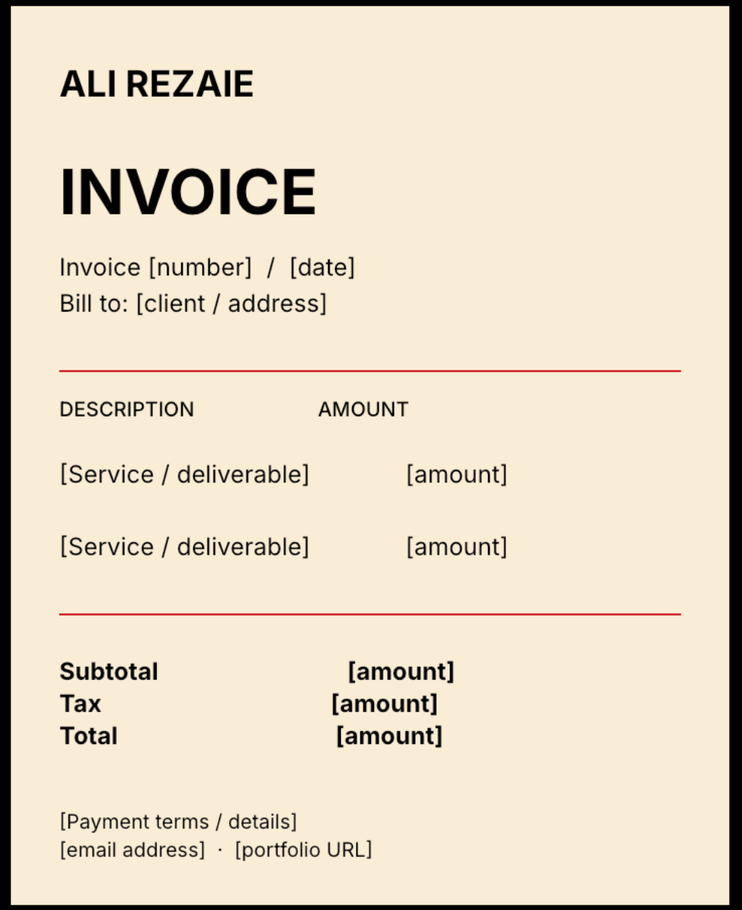

Proposal & invoice system

Design the decision, then the detail

Proposals lead with objective, scope, deliverables, timeline and fee. Use concise sections and an explicit acceptance step.

Invoices stay functional

Include a unique number, date, client, line items, subtotal, applicable tax, total and payment instructions. All sample fields are placeholders.

ALI REZAIE

INVOICE

Invoice [number] / [date]
Bill to: [client / address]

DESCRIPTION	AMOUNT

Digital & motion

06

DIGITAL & MOTION

A consistent identity across screens, feeds and films.

LinkedIn banner & profile

Ali Rezaie

Visual Designer & Filmmaker

Design. Create. Capture. Tell Stories.

Profile headline

Visual Designer & Filmmaker | Graphic Design & Video Production | Storytelling through design and motion

Export & crop

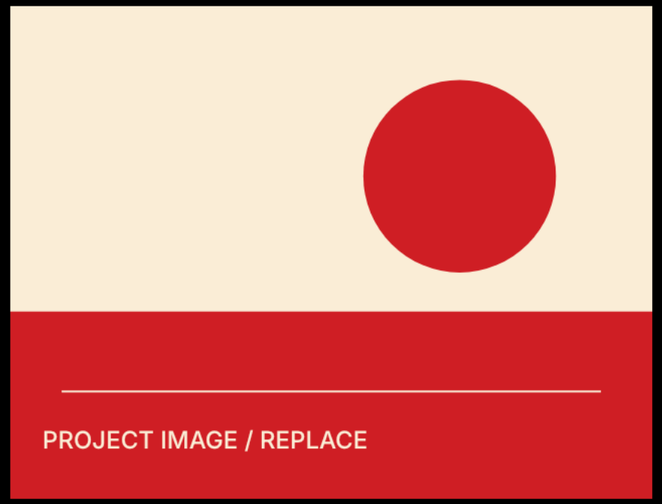

Export at 1584 × 396 px. Keep text away from the lower-left profile overlap. Test current platform crops before upload.

Social identity & post templates

Avatar / 1:1

[Project title]

[Role] / [Year]

Pair project evidence with process insights. Keep a consistent hierarchy; use Red sparingly as the visual hook.

Portfolio website: desktop & mobile

ALI REZAIE

Work About Contact

Visual stories. Designed to connect.

Graphic design & video production for brands with something to say.

View selected work →

ALI REZAIE Menu

Visual stories. Designed to connect.

Graphic design & video production.

Lead with selected work. Use concise case studies: challenge → contribution → result. Provide a visible contact action.

Video title cards & lower thirds

ALI REZAIE / FILM

[FILM TITLE]

[Subtitle / date]

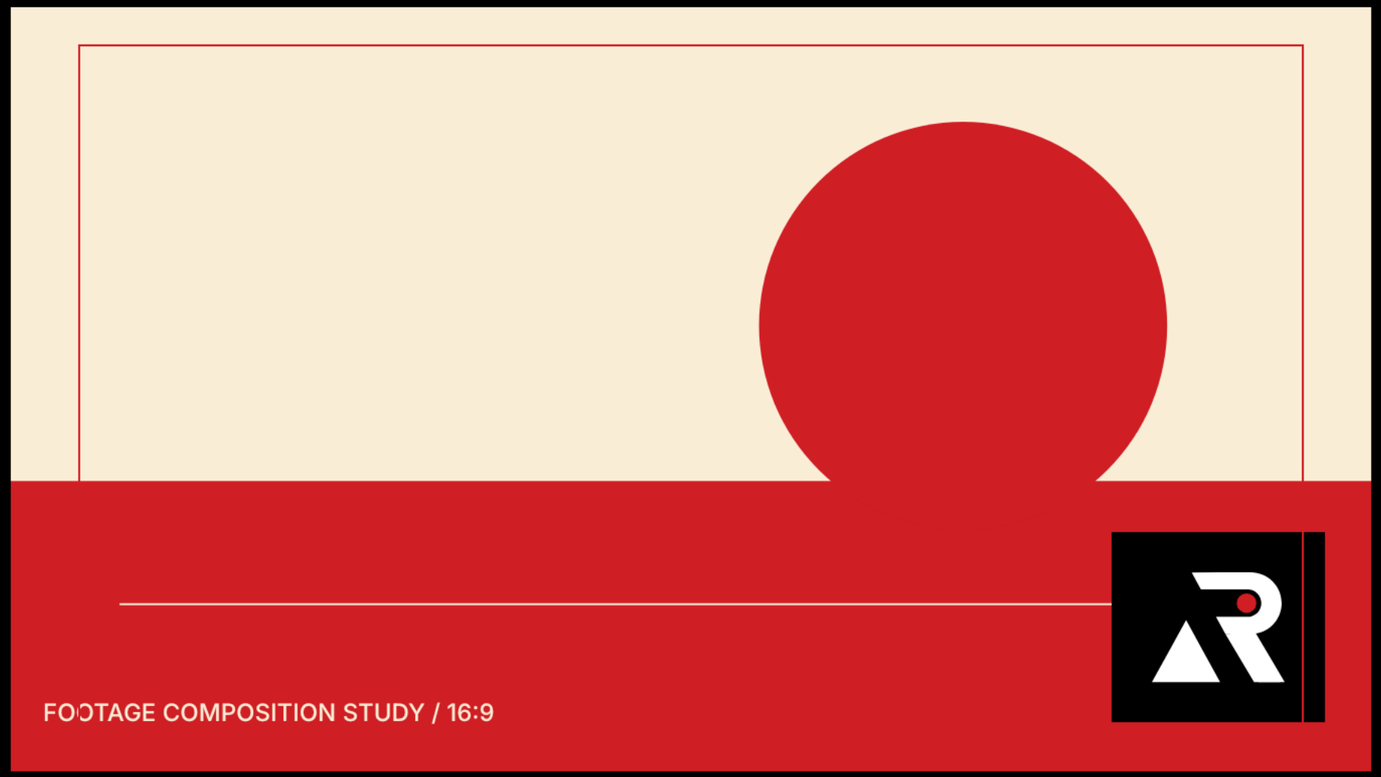

[Name]

[Role / organization]

Quiet entrance. Clear read. Clean exit.

Prefer 250–400 ms fades and subtle position changes. Hold title long enough to read comfortably.

Watermark & end slate

Watermark placement

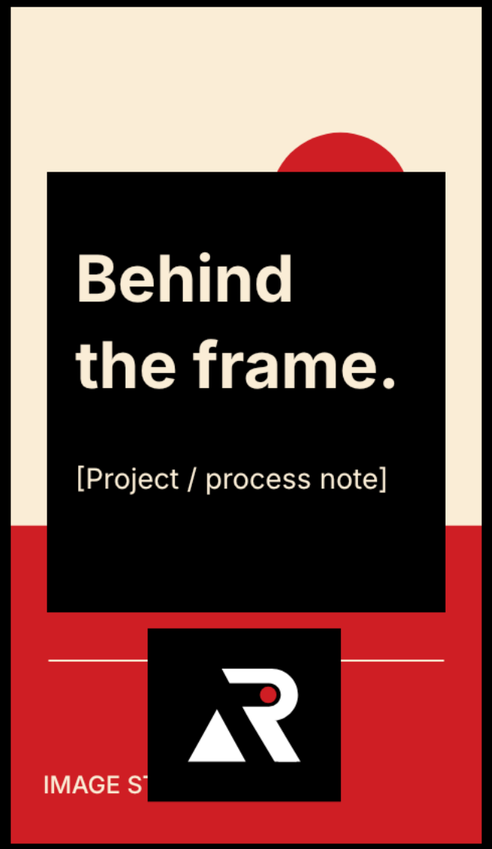

Use a 96–144 px wide master in 1080p. Set at least 5% inset from frame edges; keep it inside destination-safe areas.

Keep the master unchanged

Default to full opacity on a black carrier. Avoid fading the red lens into footage. Use selectively; do not compete with titles or subtitles.

End slate: unchanged AR logo + Ali Rezaie + approved tagline + confirmed portfolio URL.

Vertical video & social story

Design for the interface

Use a central text zone. Leave room for account UI, captions and engagement controls. Test the actual platform before posting.

Build a repeatable story arc

Open with one clear idea → show process or evidence → end with a useful takeaway. Keep subtitles high contrast, concise and inside the safe zone.

Suggested subtitle style: Inter Medium, Cream on opaque Black, two lines maximum. Adapt size to final viewing distance.

Motion behavior & audio direction

01

Open with intention

Establish the story in the first moments. Use a purposeful cut, clear title or meaningful visual detail.

02

Move with restraint

Favor fades, measured transitions and motivated camera movement. Keep logo paths static and intact.

03

Close with recognition

End with a simple brand slate. Keep the logo, name and tagline visible long enough to read.

Sound supports the narrative

Use clean dialogue, controlled ambience and licensed music. Keep pacing and audio levels consistent. Choose mood through the story, not through a fixed gimmick.

Brand strategy

07

BRAND STRATEGY

Creative judgment, cinematic craft and purposeful storytelling.

Positioning & audience

A visual designer and filmmaker turning ideas into stories people can see and feel.

Core offer

Graphic design and video production: visual identity, campaign design, brand films and content that share a coherent creative direction.

Best-fit audience

Brands, teams and entrepreneurs seeking thoughtful visual communication, consistent execution and a creative partner across design and film.

Brand pillars & personality

Creative

Find a distinct visual idea with a clear purpose.

Cinematic

Use framing, light and rhythm to create feeling.

Modern

Keep the system clean, relevant and adaptable.

Professional

Be organized, clear and reliable from brief to delivery.

Storytelling

Give every visual a role in the larger narrative.

Versatile

Adapt craft to the medium while keeping the identity coherent.

Service architecture

Graphic design

Identity · campaigns · editorial · visual systems

Video production

Brand films · content · editing · motion graphics

SUPPORTING CAPABILITIES

Photography / UI & UX / Social media / HTML & CSS

Lead with the two primary services. Introduce supporting capabilities when they directly improve the project outcome.

From brief to final story

01

Discover

Audience, objective, scope and creative constraints.

02

Define

Story, direction, references and measures of success.

03

Create

Concepts, design, production and focused feedback.

04

Deliver

Approved assets, organized files and practical guidance.

Build trust through clear milestones, transparent scope and accurate examples of your own contribution.

Asset handoff & publishing checklist

01

Logo assets

Keep the master SVG untouched. Export PNG on black/transparent with a black carrier where needed. Check final-size legibility.

02

Print assets

Confirm trim, bleed, safe zones, ICC profile and paper. Proof exact color and contact details before production.

03

Digital assets

Replace placeholders and image studies. Check crop, contrast, spelling, rights, links and destination dimensions.

Figma source structure

Every slide is an editable frame. Logo and application masters are components; repeat use is linked through instances. Brand fills use variables; Inter styles are reusable.

Source naming

AR / [asset] / [variant]
Exports: AR_[asset]_[size]_[version]
Keep dated source and approved export folders separate.

The story behind the work

Brand story

Ali Rezaie brings design and filmmaking into one creative practice. Graphic systems create recognition; moving images create emotion. Purposeful storytelling connects both disciplines.

Mission

Turn ideas into clear visual communication and compelling films through thoughtful creative direction and consistent craft.

Vision

Build a recognizable creative practice trusted to shape how brands look, communicate and tell their stories.

Working strategic statements: align each project, portfolio entry and introduction with this creative purpose.

Content strategy & channel roles

PROJECTS

Show the finished work.

Challenge → role → outcome. Share design systems, film excerpts and accurate contributions.

PROCESS

Reveal the thinking.

Share sketches, edit decisions, framing choices and behind-the-scenes details that explain your judgment.

PERSPECTIVE

Offer a useful idea.

Teach one clear lesson about visual communication, cinematic craft or purposeful storytelling.

LinkedIn / professional context

Portfolio / depth and evidence

Social / discovery and process

Video / narrative and emotional connection

Case studies: make your role visible

01

Context

Name the client, challenge and intended audience. Show what needed to change.

02

Contribution

State your exact role, scope, collaborators and creative decisions. Avoid implying sole ownership.

03

Outcome

Show the final work and verified result. Use real metrics only when available; explain qualitative impact clearly.

[Project name]

[Client] / [Year] / [Your role]

[HERO IMAGE OR FILM STILL]

01 Challenge 02 Process 03 Result

[Short summary of the project outcome.]

Make the story recognizable.

Design.
